

How long have you worked with Mr. Tomlinson?

For 2 - 3 years, through July 2010.

What type of work did he do for you?

Adam provided technical and product support for our metal roofing and wall cladding systems (and other BUR-type roofing systems with which I am not directly involved). His role as Product Manager included system selection, project specifications, testing and wind uplift considerations, detailing, and general roofing practices.

Did he always meet deadlines?

With a very substantial workload, Adam was extremely responsive and promptly completed assignments.

Would you recommend him?

I would recommend Adam for a position in the roofing or building systems industry.

Regards,

Technical Director
